III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

During the inspection, the center was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.8131

Professional development requirements.

(12) When the department of licensing and regulatory affairs or the department of education publishes a notice that a new health and safety update document or a new health and safety update training activity has been published on MiRegistry, the licensee shall ensure that all personnel read and acknowledge the document or complete the activity within 6 month of the notice.

The 2021 Child and Safety Refresher course was not completed by staff members.

R 400.8134

Hand washing.

(3) Staff and volunteers shall ensure that children wash their hands at all of the following times:

(a) Before meals, snacks, or food preparation experiences.

The children used hand sanitizer to clean their hands before snack time instead of washing hands properly.

R 400.8146

Information provided to parents.

(2) Written documentation that the parent received the written information packet, as required by subrule (1) of this rule, must be kept on file at the center.

The child care staff provided a parent handbook for the preschool program that was given to each child's parent or guardian, but no written documentation was kept on file.

During the inspection, I observed the preschoolers engaged in developmentally appropriate free play, having snack, and completion of an art project. The lead caregiver is committed to providing quality care in an educational environment and pursues professional development independently.

IV. RECOMMENDATION

Upon receipt of an acceptable corrective action plan, I recommend issuance of a regular license to this child care center.
