III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

When I arrived for the onsite inspection three child care staff members were providing care for four children. Children in care were sleeping. As children awoke, child care staff provided individualized care. Staff were observed to work as a team providing a positive environment for the children. The classroom is well organized, inviting, and has a sufficient amount of developmentally appropriate equipment for the children to choose from.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
