**III. DESCRIPTION OF FINDINGS & CONCLUSIONS**

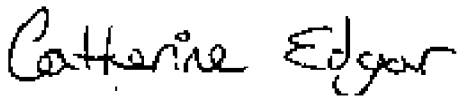

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

\*At the time of the 4/20/21 onsite inspection, I observed the refrigerator in the GSRP classroom (Room 330) reading higher than 41 degrees. I turned the temperature down and advised staff to recheck the temperature. If the refrigerator is not able to maintain a temperature of 41 degrees or lower, it will need to be replaced.

#### IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
