Capacity:	20
Program Type:	CHILD CARE CENTER

II. Purpose of Addendum

On November 11, 2022, licensee designee Priscilla Ahrens requested to add Room 104 as approved child use space. She requested that the capacity of the center remain the same.

III. Methodology

11/09/2022 – Inspection Completed Onsite
11/09/2022 - Modification Request Received

IV. Description of Findings and Conclusions

The terms of the original license have been modified on December 09, 2022, May 17, 2017 and October 15, 2008.

Faith Baptist Preschool is located in the Faith Baptist Church in Davison, Michigan. The church also has a currently operating school.

On November 04, 2022, I inspected Classroom 104.

- Classroom 104 is 21 ft. x 29 ft., providing a total of 609 square feet. This allows for a total capacity of 17 children ages 2.5 - 12 years of age. There is an attached bathroom with one sink and one toilet attached to the room. This room will be used as a gross motor room used periodically throughout the day by the children. This will not increase the overall capacity of the center.

The following areas were previously inspected and approved:

- Classroom 102 measures 29 ft. x 29 ft., providing a total of 841 square feet. This allows for a total capacity of 24 children aged 2.5 to 12 years; however the licensee has requested to cap the program at 20 children. There is one handwashing sink in the classroom and an attached bathroom to the classroom which contains one sink and one toilet.

The center will utilize the hallway bathroom which is a shared space with the school and church. Direct supervision will occur at all times when the children use this space. The bathroom contains 4 handwashing sinks and 8 toilets.

The following rooms are approved as additional child use space and is not used to determine the center's total capacity:

- The school cafeteria was previously approved when the license was issued on August 24, 2005. The children periodically use this space when needed for lunchtime, but currently are not using it.

The classrooms are furnished with a variety of developmentally appropriate equipment. There is an adequate amount of equipment to support the capacity of the facility.

A lead hazard risk assessment was not required since the building was constructed after 1978. An "A" rated Environmental Health Inspection was completed on September 30, 2022. An "A" rated Fire Safety Inspection (school sign off) was completed on August 25, 2022.

The center has a playground adjacent to the center with two elevated play structures. A playground inspection was completed on October 06, 2021, with no areas of concern.

The total space is sufficient for a total center capacity of 20 children, 2.5 through 5 years of age, at the request of the licensee designee.

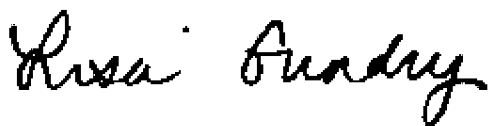

There are a total of 7 hand washing sinks, 10 toilets, located throughout the center. This supports the center's capacity.

Terms:

The facility is licensed for 20 children aged 2.5 to 5 years of age. The parents provide lunch and snack.

V. Recommendation

I recommend the approval of Classroom 104. Per the licensee designee's request, the capacity of the center will remain at 20.
