## III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

- On January 30, 2022, I provided technical assistance to the building supervisor regarding the sinks in the girl's restroom located in the hallway. Calking is missing from between the sink and wall. I recommend the calking be repaired.

#### IV. RECOMMENDATION

I recommend issuance of a regular license to the child care center (capacity 40).
