III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

*While at the facility, I discussed the newly-built playground that is adjacent to the building that houses the child care program. I inspected this playground and determined that the following pieces of equipment may be used:

- The smaller multipurpose climber/slide (as long as the children are at least 2 years of age)
- The lady bug piece
- The bucket swing (as long as the children are at least age 2)
- The musical wall
- The stumps balance beams for seated activities.

Per the technical assistance and consultation manual regarding licensing rule R 400.8170(5) – Outdoor play area: “A Center that utilize a park or other off-site outdoor play area are not required to have these areas inspected by a CPSI. However, center staff must assure the play area is in “safe condition” prior to EACH time children use this area.”

IV. RECOMMENDATION

I recommend issuance of a original license to this child care center.
