III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

The center operates all year round and provides both part time and full-time care for children. The center does not participate in swimming, transportation, or food service. During the on-site inspection, I observed the children engaged several activities to include but limited to infant/toddler care practices, freedom of choice learning, structured learning time, art, and outdoor play time.

I provided a rule review regarding infant safe sleep rules and ways to obtain infant safe sleep training; ways to obtain basic first aid and CPR training that counts for training but not certification; and the newest version of the child information cards and assuring that there are no blanks or "N/A". The center is not currently using one swing set on the playground. Once a passing playground inspection is received, the swing set may be used by the children.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
