III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

During the inspection, the center was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.8170

Outdoor play area.

(11) The playground equipment, use zones, and surfacing in the outdoor play area must be inspected by a certified playground safety inspector and an approval granted for playground equipment and areas used before issuance of an original license, upon request of the department, and before using any newly added playground equipment. The center shall provide documentation of the inspection to the department upon request and shall keep it on file at the center.

During the onsite inspection, I observed that climbing equipment was added and moved in the outdoor play area. The equipment was not inspected or approved by a certified public playground inspector before use.

A corrective action plan was requested and approved on 08/07/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular child care license.
