III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During the inspection, the center was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.8131 Professional development requirements.

(12) When the department of licensing and regulatory affairs or the department of education publishes a notice that a new health and safety update document or a new health and safety update training activity has been published on MiRegistry, the licensee shall ensure that all personnel read and acknowledge the document or complete the activity within 6 month of the notice.

During a review of the records, I found that 2 child care staff members had not completed Health and Safety training refresher courses in the given time-frame.

R 400.8173 Equipment.

(6) A minimum of 2 playspaces must be accessible per child in attendance on any given day during child-initiated activity time.

During my inspection, I observed that all rooms did not have the required 2 play spaces out and accessible per child in attendance.

IV. RECOMMENDATION

Upon receipt of an acceptable corrective action plan, I recommend the license be renewed.
