IV. Description of Findings and Conclusions

The terms of the original license has been modified on August 30, 2005, August 31, 2006, August 6, 2007, October 15, 2007, November 30, 2012, May 16, 2014, November 21, 2016, and September 16, 2021.

The modification will approve the gross motor room for child care use space. The room measured 30 feet by 31 feet (930 square feet) plus 13 feet by 7 (91 square feet), minus 64 square feet of non-usable space for a total of 957 square feet of space. The licensee designee is aware if the room is used for mixed age group; based on 50 square feet per child (infants to 2 ½ years of age) the room can accommodate 19 and based on 35 square feet per child (2 ½ years of age and older) the room can accommodate 27.

The room is used by the church during non-child care hours. Mrs. Smick is aware the room must be safe and free from any hazards prior to children using the room.

The following rooms and room capacities were previously approved by the department:

GSRP room measures 30 feet by 23 feet and 7 by 12 feet for a total of 74 feet of usable child care space. Based on 35 square feet of space per child this would accommodate 22 children ages 4-5 years of age, however at this time the licensee has requested a total of 16 children at any given time.

Room 1 (previously GSRP Room) infant/toddler room, measures 24 feet by 14 feet for a total of 336 square feet of space. Based on 50 square feet of space per child the room can accommodate 7 children at any one time.

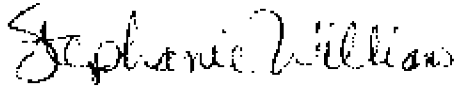

Room 2 (infant room/nursery) measures 20 feet by 14 feet for a total of 280 square feet of usable child care space. Based on 50 square feet of space per child the room can accommodate 6 children at any one time; however, based on the amount of equipment, the room capacity is limited to 4.

Room 4 (preschool room/school age) measures 48 feet by 24 feet for a total of 1,152 square feet of useable child care space. Based on 35 square feet per child the room can accommodate 33 children ages 3-12 years of age at any one time. Based on the amount of equipment, however, the room capacity is limited to 24. 3

There are 6 toilets and five sinks available for children's use in the facility. The infant and infant/toddler rooms have separate food and diapering sinks available.

V. Recommendation

I recommend the addition of the gross motor room as approved child care use space.
