**III. DESCRIPTION OF FINDINGS & CONCLUSIONS**

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

During the exit conference I provided Ms. Panichella with Technical Assistance regarding room space, room capacity, and equipment. I observed during the inspection that the lead caregivers were creating offices for themselves with adult sized desks, filing cabinets, and areas exclusively set up for their use. Any adult sized equipment or work area takes away from approved child care space and affects the overall capacity of children in a room. If this issue is not addressed during room arrangement set up prior to the next inspection it will be cited.
