|----------------|---|

Dear Mrs. Sullivan:

Attached is the Addendum to the Original Licensing Study Report for the above referenced facility.

Please review the enclosed documentation for accuracy and contact me with any questions. In the event that I am not available and you need to speak to someone immediately, please contact the local office at (810) 787-7031.

Per MCL 722.113g, this report must be filed in your licensing notebook.

Sincerely,

Stephanie A. Williams, Licensing Consultant  
Child Care Licensing Bureau

## **II. Purpose of Addendum**

Mrs. Sullivan, licensee designee has requested the addition of Great Start to Readiness Program (GSRP) component added to the license.

## **III. Methodology**

10/10/2022 Contact – Document Received- Modification request form from Mrs. Sullivan requesting the addition of GSRP to the license.

10/10/2022 Inspection Completed On-site

10/10/2022 Inspection Completed Full-Compliance

## **IV. Description of Findings and Conclusions**

The terms of the original license has been modified on October 10, 2022. The room was not remeasured as the dimension/measurements have not changed. The overall capacity of 30 will remain the same.

The center has an open space room and the entire room will be used for GSRP from September to June following school calendar year. The operational times for GSRP will be from 8:30 a.m. to 3:30 pm, Monday through Thursday. The room previously measured a total of 1,406 square feet of usable child care space. The maximum capacity for the room is 30 child care children (due to the center having only 2 toilets) however during GSRP operational times the capacity is 18 child care children.

The room will continue to be used for before and after care for child care children and school age children. The licensee designee is aware that if there are children of mixed ages in the same room or well-defined space, then the ratio and group size shall be determined by the age of the youngest child. If children aged 2 ½ to 3 years of age are present then the maximum group size of child care children would be 16.

Below is the previous measured space:

The center has an open space room and the entire room will be used for preschool and school age. The preschool/school age room measures 43 square feet by 35 square feet (1,505 square feet) minus 11 square feet by 9 square feet (99 square feet) for a total of 1,406 square feet of usable child care space. The preschool/school age room square footage would typically allow for a capacity of 40 children based on 35 square feet per child but since the center only has two toilets the maximum capacity of the room is 30.

**V. Recommendation**

I recommend the addition of the GSRP component to the center's license.

*Stephanie Williams*
