II. Purpose of Addendum

Mrs. LaSainte Roberson, licensee designee has requested the following changes to the license:

- An increase in capacity from 27 to 43 with the addition of two rooms.
- Change in age range for current licensed infant room.
- Change in operation time.

III. Methodology

05/10/2022 Contact Document Received – Modification Request

05/11/2022 Contact Document Received – Supportive documents received from licensee designee.

05/16/2022 Contact Document Received – Supportive documents received from licensee designee.

IV. Description of Findings and Conclusions

On 05/10/2022, Mrs. Roberson requested a modification of the license. The license has been modified on 05/24/2022.

Toddler room (2 ½ and up) measured 20 square feet by 18 square feet for a total of 360 feet of usable child care space. The room capacity based on 35 square feet per child is 10.

Young toddler room (newborn to 3 years of age) measured 28 square feet by 11 square feet for a total of 308 feet of usable child care space. The room capacity based on 50 square feet per child is 6. The licensee designee is aware when there are children of mixed ages then the ratio and group size is determined by the youngest child.

The previously approved Infant room was licensed for age range (newborn to 18 months). The infant room will be licensed for (newborn to 3 years of age).

The center will now operate from 6:00 a.m.-12:00 a.m.

The following rooms were previously approved:

Infant Room measured 19 square feet by 17 square feet for a total of 323 square feet of usable child care space. The room capacity based on 50 square feet per child is 6. The licensee designee is aware she can only have four infants at any one time due to only having four cribs in the room.

Preschool Room (2 ½ years and up) measured 28 square feet by 26 square feet for 728 square feet of usable child care space. The room capacity based on 35 square feet per child is 21. The licensee designee is aware when there are children of mixed ages then the ratio and group size is determined by the youngest child.

The gross motor area 1 (yellow area) measured 8 square feet by 18 square feet for a total of 144 square feet. The gross motor area can accommodate 4 children at any one time.

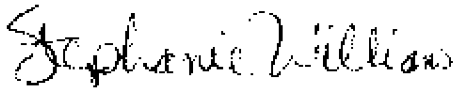

The gross motor area 2 measured 12 square feet by 20 square feet for a total of 240 square feet. The gross motor area can accommodate 7 children at any one time.

The gross motor areas are only used for children 30 months of age and older.

V. Recommendation

I recommend the following:

- An increase in capacity from 27 to 43 with the addition of two rooms.
- Change in age range for current licensed infant room.
- Change in operation time
