III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

During the on-site inspection I observed free play along with child care staff members ~~givers~~ engaging with the children. I also observed two small group times that were led by two child care staff members. I observed handwashing after toileting.

Before heading outdoors, child care staff members counted all child care children before going outside. The child care staff members were very hands on with the children outside and engaging with them during play.

I observed hand washing before and after lunch. The child care children were very in tuned to their routine and knew what to do right after lunch which was hand washing and preparing for nap time.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
