III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During my on-site inspection I observed free choice time, large group, centers, story time before lunch, hand washing after toileting, child care givers counting all children before heading outside and hand washing before lunch. Interactions between child care staff members and child care children were positive.

Technical assistance was provided in regard to keeping consent and disclosure packet in the child care staff members files.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
