III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

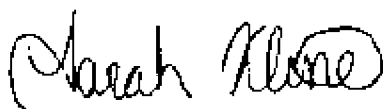

The facility is in compliance with all applicable rules and statutes.

Technical Assistance was provided in the following areas:

- Each caregiver file needs to have their current name, address, and phone number.
- On the emergency plans it is a little unclear how the parents will be contacted when there is fire, tornado, natural/man made disaster. Since the center is now using bright wheel, thinking a mass message would be sent out.
- Please include in the statement about children with special needs will have a plan created for them, children with chronic medical conditions as well.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
