**III. DESCRIPTION OF FINDINGS & CONCLUSIONS**

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During the inspection, the center was found to be in compliance with all applicable rules and statutes except for the following violations:

**R 400.8134            Hand washing.**

(4) Guidelines for hand washing must be posted in food preparation areas, in toilet rooms, and by all hand washing sinks.

The hand washing sink located in the multi-purpose room did not have the guidelines for hand washing posted.

**R 400.8152            Medication; administrative procedures.**

(4) Prescription medication must have the pharmacy label indicating the physician's name, child's first and last name, instructions, name and strength of the medication, and must be given according to those instructions.

A prescription epinephrine pen located in the office did not have a pharmacy label with the required information.

**R 400.8340            Food services and nutrition; provided by parents.**

(7) Milk and other beverages furnished in a multi-day supply must be labeled with the child's first and last name and the date of opening and be returned to the parent or discarded 7 days after opening.

In the gymnasium there were two water bottles only labeled with the children's first name, and one water bottle that was not labeled with any child's name.

**IV. RECOMMENDATION**

Upon receipt of an acceptable written corrective action plan, I recommend issuance of a regular license to this child care center.
