There is an adequate supply of developmentally appropriate toys and equipment of the children's use.

There are a total of 6 toilets and 8 sinks in the center which is enough for the capacity of 60.

The outdoor play area is located behind the building and is completely fenced. There are no water hazards. There are two elevated play structures. One just has climbing areas and the other has slides and climbing area. There is one tire swing.

There is a sandbox with a cover for shade. There are also trees for shade. There are riding toys, playhouses, and picnic tables for the children's use.

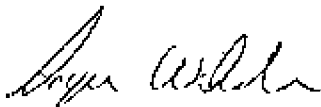

A lead risk inspection was completed on 11/7/2020. There were no lead hazards.

The playground safety inspection was completed in 2009 by the previous owner. The previous owner provided written authorization to use the existing inspection. I observed the playground equipment to be safe for the children to use.

The center will care for children from birth to school age. It is open Monday through Friday from 7:00 AM to 6:00 PM. Both full and part time care is provided. The center will not provide transportation or swimming. The center provides all meals for the children.

V. Recommendation

I recommend the new room measurements and the capacity of the center to be changed to 60.
