The total space is sufficient for a total center capacity of 153 preschool and school aged children. The gymnasium was previously approved but will not be used at this time.

There is a total of 17 toilets and 15 sinks designated for the preschool and child care rooms. This supports the center's capacity increase.

- A natural play area is located in a court yard in the preschool wing of the school building.
- A natural playground is located on the north-east section of the school property off of Spring Street. The playground is completely fenced in. At the time of inspection there were no elevated surfaces higher than 30 inches.
- The preschool playground has some installed equipment and some natural elements. This playground is adjacent to the natural playground. The area is fully fenced in. At the time of inspection there were no elevated surfaces higher than 30 inches. The equipment was approved by a certified playground inspector on 09/12/2022.

Technical assistance has been provided to the licensee designee to ensure that surfacing under logs, stumps, and rocks that create elevated surfaces are maintained to ensure they do not become higher than 30 inches high.

There is a variety of natural materials for the children to use in all outdoor play areas.

The licensee designee is aware of maintaining required child-to-staff ratios and group sizes for all groups on the playgrounds. Direct supervision is required in all outdoor play areas.
