IV. Description of Findings and Conclusions

Horizon Learning Center is located in the Horizon Kid's Complex at 6462 Center Industrial Drive, Jenison, Michigan, 49428. The center recently separated its infant room into two well-defined spaces, which needed to be re-measured and checked for capacity.

The Younger Infant Room measures approximately 20ft by 36ft, for a total of 720 square feet. This is adequate space for the maximum group size capacity of 12 children, birth through 30 months of age.

The Older Infant Room measures approximately 21ft by 18ft, for a total of 378 square feet. This is adequate space for 8 children under 30 months of age.

Previously approved space:

- The Toddler Room measures approximately 19ft x 21ft for a total of 380 square feet. This is adequate space for a total of 10 children aged 30 months or above, or 8 children under 30 months of age.
- The Preschool Room measures approximately 21ft x 25ft for a total of 525 square feet. This is adequate space for up to 15 children aged 30 months and above, or 11 children under 30 months of age.
- The Older Preschool Room measures 868 square feet. This is sufficient space for 25 preschool age children; the requested capacity is 15 preschool age children.

There are 7 sinks and 4 toilets and 1 urinal available for children's use. This is sufficient to support an increased capacity of 67 children.

There is an adequate amount of learning equipment to support the capacity of 67 children. A new fire safety inspection report was completed on 08/28/2022 and resulted in an A rating. New Environmental Health and Lead Safety inspections were not required for this modification.

V. Recommendation

I recommend the addition of new child use space for infants and an increase in capacity to 67.
