III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During the on-site inspection, I observed child care staff members and children arriving back at the center after a field trip. I observed appropriate hand washing techniques being utilized before lunch time. I observed caregivers providing direct supervision of children napping during rest time. I observed children engaged in outdoor play activities. I observed children engaged in free play activities. I also

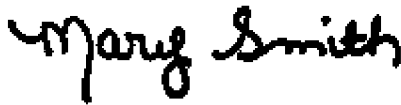

observed parents, caregivers, and children during pick up time. Caregiver interactions with children were positive and nurturing. Staff and children records were organized and readily available.

Technical Assistance was provided regarding R400.8131(5) ensuring that within 90 days of being hired, all child care staff members and unsupervised volunteers complete Health and Safety 1 & 2 training modules on MiRegistry. The child care staff members had taken the wrong Health and Safety training modules and had taken the refresher courses, which were incorrect.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care center.
