Findings of the Inspection

A copy of this renewal inspection report and any associated corrective action plans is available on the Child Care Licensing Bureau [website](#) under [Statewide Search for Licensed Child Care Centers and Homes](#). A description of when renewal inspection reports are completed can be found under [Overview of Licensing Reports](#).

The renewal inspection involved a review of all applicable child care center [administrative rules](#) and [statutes](#). Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During the onsite inspection, I observed child care staff members providing direct supervision of children napping during rest time upon my arrival. I observed hand washing and snack time. I observed the Michigan State University food service provider educating the children on the four food

groups. I observed the children engaged in literacy activities during large circle time. I observed the child care staff members providing direct supervision of children during outdoor play activities. I observed large gross motor activities while children were running, jumping, and exercising outside. I observed the caregivers, parents, and children during pick up time. Caregiver interactions were observed to be positive and nurturing. Required records were organized and readily available for review.

As a result of the renewal inspection(s) on 4/16/2024, licensing consultant Mary Smith did not find any rule or law violations. A regular license will be issued.
