## **IV. Description of Findings and Conclusions**

The center is located in Riverview Plaza and currently utilizes one large room on the main/upper floor. The upstairs room will be referred to as Class A.

Ms. Wonner is also utilizing a large room on the lower level, which will be referred to as Class B.

Class B measures:  $51 \times 18 = 918$  square feet and is approved for 26 children, ages 30 months and older. However, Ms. Wonner is requesting a capacity of 20 children, ages 3 thru 6 years of age.

There is one handwashing sink and one toilet in Class B. There is also another handwashing sink and toilet at the top of the stairs that is available for child care use.

The program will operate from 9:00 AM to 11:30 AM with another session from 1:40 PM to 4:00 PM

The two rooms, Class A and Class B, are one unit. Class B is up a few short stairs from the main level and Class B is down a few short stairs. The other business in the plaza do not have access to the classrooms or restrooms.

There is sufficient space and equipment for the requested capacity of 40 children, ages 3 thru 6 years of age.

**V. Recommendation**

I recommend an increase in the overall capacity from 20 to 40 children, ages 3 years thru 6.
