The licensee designee understands that the total licensed is 100 children 5-12 years and although 32 rooms are approved as child use space the center will not exceed more than 100 children at any one time. They also understand that per child care licensing rule 400.8182(7), when there are children of mixed ages in the same room or well defined space then the ratio and group size is determined by the age of the youngest child, unless each group of children is clearly separated and the appropriate child care staff member to child ratios and group sizes, if applicable, for each age group are maintained.

The total space is sufficient for a total center capacity of 100 children, 5- 12 years of age.

There is a variety and adequate amount of developmentally appropriate equipment to support the center's capacity.

There are a total of 33 toilets and 34 hand washing sinks for child use. This supports the center's capacity.

On 04/13/22, an environmental health inspection was completed. On 08/07/2021, the superintendent of the school district signed a statement certifying compliance with the fire safety codes for school building. A lead risk assessment is not required, as this is a school age program located in a school building.

Terms:

The center is approved for a capacity of 100 children ages 5 through 12 years.

The center is approved for field trip transportation using buses provided by Saline Area Schools. Swimming on field trips is approved. During the school year a prepackaged snack is drink for the before and after school program. During the summer program parents will provide lunch. The center will provide one prepackaged snack and drink.
