RE: License #: DC810404904
Squiggle Room
100 Oakbrook Dr
Ann Arbor, MI 48104

Dear Mr. Furrha:

Attached is the Addendum to the Original Licensing Study Report for the above referenced facility.

Please review the enclosed documentation for accuracy and contact me with any questions. In the event that I am not available and you need to speak to someone immediately, please contact the local office at (517) 284-9730.

Per MCL 722.113g, this report must be filed in your licensing notebook.

Sincerely,

A handwritten signature in cursive script, reading "Kathryn Curreathers".

Facility Address:	100 Oakbrook Dr Ann Arbor, MI 48104
Facility Telephone #:	(734) 369-4276
Capacity:	137
Program Type:	CHILD CARE CENTER

II. Purpose of Addendum

On March 9, 2022, licensee designee/program director Tracy Hughes submitted a modification request to divide the preschool room on the lower level into two separate spaces to be used for early preschool and preschool.

III. Methodology

03/09/2022 – Modification request received

03/09/2022 – Inspection completed onsite

IV. Description of Findings and Conclusions

The terms of the original license have been modified on February 11, 2022 and March 9, 2022.

Squiggle Room is located in Ann Arbor, Michigan in a free-standing two-story building at the corner of Oakbrook Drive. Squiggle Room operates Monday through Friday from 6:00 AM until 6:30 PM. Children may attend full or part-time.

On March 09, 2022, licensee designee/program director Tracy Hughes submitted a modification request to divide the preschool room on the lower level into two separate spaces to be used for early preschool and preschool.

The previously approved child use space continues to be used. The measurements are as follows:

- Infant 1 (left side) is 21 ft. x 37 ft., providing a total of 777 square feet. This allows for a total capacity of 16 children ages 6 weeks through 9 months. The licensee designee understands that the maximum group size for infants and toddlers is 12 and that the ratio for child care staff to children is 1 to 4. The licensee designee also understands that if the center has 16 infants in this room, there must be two well-defined areas and two lead caregivers, plus one additional caregiver.
- Infant 2 (right side) is 21 ft. x 37 ft., providing a total of 777 square feet. This allows for a total capacity of 16 children ages 9 months through 18 months. The licensee designee understands that the maximum group size for infants and toddlers ages birth until 30 months is 12 and that the ratio for child care staff to children is 1 to 4. The licensee designee also understands that if the center has 16 infants in this room, there must be two well-defined areas and two lead caregivers, plus one additional caregiver.
- Toddlers (left side) is 22 ft. x 34 ft., providing a total of 748 square feet. This allows for a total capacity of 15 children ages 18 months through 30

months. The licensee designee understands that the maximum group size for infants and toddlers ages birth until 30 months is 12 and that the ratio for child care staff to children is 1 to 4. The licensee designee also understands that if the center has toddlers in this room, there must be two well-defined areas and two lead caregivers, plus one additional caregiver.

- Toddlers (back) is 27 ft. x 27 ft., providing a total of 729 square feet. This allows for a total capacity of 15 children ages 18 months through 30 months. The licensee designee understands that the maximum group size for toddlers 18 months until 30 months is 12 and that the ratio for child care staff to children is 1 to 4.
- Pre-K (lower level) is 21 ft. x 38 ft., providing a total of 798 square feet. This allows for a total capacity of 22 children ages 4 years to 5 years. The licensee designees understands that the ratio for child care staff to children is 1 to 12.
- Movement room (lower level) is 22 ft. x 49 ft., providing a total of 1078 square feet. This allows for a total capacity of 22 infants and toddlers and 31 children preschool through school age. The licensee designee understands that if there is mixed age group in this room, the ratio is based on the ratio requirements of the youngest child. If there are infants and toddlers in this room the licensee designee understands that if the center has 22 infants in this room, there must be two well-defined areas and two lead caregivers, plus three additional caregivers. The capacity of this room was not counted toward the total capacity because it will not be used consistently.

On 03/09/2022 an onsite inspection was conducted in the room previously approved as the preschool room. This space is divided into two separate spaces by a small divider. The measurements are as follows:

- Early Preschool (lower level right side with door to outside) is 16 ft. x 34 ft., providing a total of 544 square feet. This allows for a total capacity of 16 children ages 30 months to 3 years. The licensee designee understands that the ratio for child care staff to children is 1 to 8.
- Preschool (lower level left side) is 32 ft. x 34 ft., providing a total of 1088 square feet. This allows for a total capacity of 31 children ages 3 years to 4 years. The licensee designee understands that the ratio for child care staff to children is 1 to 10 and the maximum group size is 30.

The center is currently licensed for 137 children ages birth through 12 years.

The capacity of the center at any one time cannot exceed 137 children.

The child care center has a total of 10 toilets and 12 hand washing sinks.

The children can choose from a large variety of toys and equipment. These are developmentally appropriate for the licensed age range of children birth through 12 years and are more than sufficient in quantity for the licensed capacity of 137.

An environmental health inspection was conducted on 08/03/2021 and on 01/04/2022 both with A ratings. A fire safety inspection was conducted on 08/19/2020 with an A rating. A lead hazard risk assessment was not required as the center was built in 1988.

V. Recommendation

I recommend that the request to divide the preschool room on the lower level into two separate spaces be approved to be used for early preschool and preschool.
