RE: License #: DC810404904
Squiggle Room
100 Oakbrook Dr
Ann Arbor, MI 48104

Dear Mr. Furrha:

Attached is the Addendum to the Original Licensing Study Report for the above referenced facility.

Please review the enclosed documentation for accuracy and contact me with any questions. In the event that I am not available and you need to speak to someone immediately, please contact the local office at (517) 284-9730.

Per MCL 722.113g, this report must be filed in your licensing notebook.

Sincerely,

A handwritten signature in cursive script, reading "Kathryn Curreathers".

Licensee Name:	Squiggle Room LLC
Licensee Address:	100 Oakbrook Dr Ann Arbor, MI 48104
Licensee Telephone #:	(734) 657-1565
Administrator/Licensee Designee:	Rushdi Furrha, Designee
Name of Facility:	Squiggle Room
Facility Address:	100 Oakbrook Dr Ann Arbor, MI 48104
Facility Telephone #:	(734) 369-4276
Capacity:	131
Program Type:	CHILD CARE CENTER

II. Purpose of Addendum

On November 15, 2022, licensee designee/program director Paige Cadmus submitted a modification request to divide the Toddler 2 classroom into two separate spaces and to increase the center's capacity from 129 to 131.

III. Methodology

11/15/2022 – Modification request received

11/18/2022 - Inspection complete onsite

IV. Description of Findings and Conclusions

The terms of the original license have been modified on February 11, 2022, March 9, 2022, September 21, 202 and December 13, 2022.

Squiggle Room is located in Ann Arbor, Michigan in a free-standing two-story building at the corner of Oakbrook Drive. Squiggle Room operates Monday through Friday from 6:00 AM until 6:30 PM. Children may attend full or part-time.

On November 15, 2022, licensee designee/program director Paige Cadmus submitted a modification request to divide the Toddler 2 classroom into two separate spaces and to increase the center's capacity from 129 to 131.

The approved child use space and measurements are as follows:

- Infant 1 is one large room divided into two separate spaces by a divider that allows easy access to the exit from either side of the room. The left side of the room is 18 ft. x 21 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 6 weeks through 9 months. The right side of the room is also 18 x 21 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 6 weeks through 9 months. The licensee designee understands that the ratio for child care staff to children is 1 to 4 on both sides of the room with a lead caregiver on each side. The capacity for the entire room is 16.
- Infant 2 is one large room divided into two separate spaces by a divider that allows easy access to the exit from either side of the room. The left side of the room is 18 ft. x 21 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 9 months through 18 months. The right side of the room is 18 x 21 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 9 months through 18 months. The licensee designee understands that the ratio for child care staff to children is 1 to 4 on both sides of the room with a lead caregiver on each side. The capacity for the entire room is 16.

- Toddlers 1 is one large room divided into two separate spaces by cabinets that allow easy access to the exit from either side of the room. The left side of the room with the sink is 18 ft. x 21 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 18 months through 30 months. The right side of the room is 17 ft. x 21 ft., providing a total of 357 square feet. This allows for a total capacity of 7 children ages 18 months through 30 months. The licensee designee understands that the ratio for child care staff to children is 1 to 4 on both sides of the room with a lead caregiver on each side. The capacity for the entire room is 15.
- Toddlers 2 (back) is one large room divided into two separate spaces by cabinets that allow easy access to the exit from either side of the room. The left side of the room is 14 ft. x 27 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 18 months through 30 months. The right side of the room is 14 ft. x 27 ft., providing a total of 378 square feet. This allows for a total capacity of 8 children ages 18 months through 30 months. The licensee designee understands that the ratio for child care staff to children is 1 to 4 on both sides of the room with a lead caregiver on each side. The capacity for the entire room is 16.
- Early Preschool is one part of a large space divided into two separate rooms (lower level with door that leads outside) is 16ft. x 34 ft., providing a total of 544 square feet. This allows for a total capacity of 16 children aged 30 months to 3 years. The licensee designee understands that the ratio for child care staff to children is 1 to 8.
- Preschool is one part of a large space divided into two separate rooms (lower level) is 31ft. x 34 ft., providing a total of 1054 square feet. This allows for a total capacity of 30 children aged 4 years. The licensee designee understands that the ratio for child care staff to children is 1 to 12.
- Pre-K (lower level) is 21 ft. x 38 ft., providing a total of 798 square feet. This allows for a total capacity of 22 children ages 4 years to 5 years. The licensee designees understands that the ratio for child care staff to children is 1 to 12.
- Movement room (lower level) is 22 ft. x 49 ft., providing a total of 1078 square feet. This allows for a total capacity of 22 infants and toddlers and 31 children preschool through school age. The licensee designee understands that if there is mixed age group in this room, the ratio is based on the ratio requirements of the youngest child. If there are infants and toddlers in this room the licensee designee understands that if the center has 22 infants in this room, there must be two well-defined areas and two lead caregivers, plus three additional caregivers. The capacity of this room

was not counted toward the total capacity because it will not be used consistently.

The center is currently licensed for 131 children ages birth through 12 years.

The capacity of the center at any one time cannot exceed 131 children.

The child care center has a total of 10 toilets and 12 hand washing sinks.

The children can choose from a large variety of toys and equipment. These are developmentally appropriate for the licensed age range of children birth through 12 years and are more than sufficient in quantity for the licensed capacity of 131.

An environmental health inspection was conducted on 08/03/2021 and on 01/04/2022 both with A ratings. A fire safety inspection was conducted on 08/19/2020 with an A rating. A lead hazard risk assessment was not required as the center was built in 1988.

V. Recommendation

I recommend that the request to divide the Toddlers 2 classroom into two separate spaces with an increase in capacity from 129 to 131 be approved.

12/13/2022
