## II. Purpose of Addendum

The licensee requested an increase in capacity from 52 to 60 by changing classroom 6 capacity from 16 to 24 preschoolers. Additionally, the licensee requested that the age range be changed from 4 years to 11 years to 3 years to 11 years.

## III. Methodology

04/28/2023 Document Received: Modification Request Received

## IV. Description of Findings and Conclusions

The terms of the original license have been modified on 7/13/2015 and 04/28/2023.

### **Approved space (room numbers, sizes, capacity, and ages of children for which each room/well-defined space is approved, etc.):**

Room 6 measures 34 x 25 which is approximately 850 square feet. Which can accommodate 24 preschool age children.

Previously approved space includes:

Room 10 measures 36' x 30' which is approximately 1080 square feet. The space is approved for children 5 thru 11 years of age, never to exceed the capacity of 23 per the recommendation of the Environmental Health Department. The licensee will use the space during the summer months for day camp. The room is also approved for Grade School Readiness Program (GSRP) during the school year with a maximum capacity of 16. There is a varied and adequate amount of developmentally appropriate equipment available for children's use.

Rooms 8 and 9 independently measure 19' x 22' which is approximately 418 square feet. The capacity for each room is 10, ages 4-5, based on the Environmental Health Department recommendation due to lighting and ventilation.

The facility has four toilets and four hand washing sinks which supports the capacity increase from 52-60.

**V. Recommendation**

I recommend the license be modified to include age ranges 3 through 11. I also recommend the increase in capacity from 52 to 60 children.
