## III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center's records, including staff records and children's records. Staff records include background checks and training information. Children's records include child information cards, physical examination dates, and immunizations.

The facility is in compliance with all applicable rules and statutes.

On 05/02/2023, during an onsite inspection, I observed children arriving to the program. Staff and Children went to the cafeteria to have a snack before dropping off students items down in the classroom. Afterwards, staff and students went to the gym where they were allowed to play with a variety of equipment including basketballs, scooters, and a bowling set.

Technical assistance was provided to Licensee Designee regarding making sure that staffing plans match CCBC. Everyone, including volunteers, licensee designees, program directors and child care staff members, should be listed on the staffing plan with the correct roles. If the organization is going to keep all vendors connected on CCBC, all sites need to have a copy of all vendors records including consent and disclosure forms and abuse and neglect statements.

#### IV. RECOMMENDATION

I recommend issuance of a regular child care license to this facility.
