III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care center administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the center’s records, including staff records and children’s records. Staff records include background checks and training information. Children’s records include child information cards, physical examination dates, and immunizations.

During the inspection, the center was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.8134 Hand washing.

- (3) Staff and volunteers shall ensure that children wash their hands at all of the following times:**
- (a) Before meals, snacks, or food preparation experiences.**
 - (b) After toileting or diapering.**
 - (c) After handling animals and pets.**
 - (d) When soiled.**

The child care staff members did not wash the infants hands after diapering.

R 400.8182 Ratio and group size requirements.

- (7) If there are children of mixed ages in the same room or well-defined space, then the ratio and group size is determined by the age of the youngest child, unless each group of children is clearly separated and the appropriate child care staff member-to-child ratios and group sizes, if applicable, for each age group are maintained.**

The Pre-S and Pre-K class was out of ratio. In this mixed group there was one caregiver to 12 children. the youngest child was three years so the ratio should've been one to 10 children ages three to five years.

IV. RECOMMENDATION

Upon receipt of an acceptable corrective action plan and environmental health inspection, I recommend the issuance of a regular license to this childcare facility.
