III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records.

Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1907 Child's records.

(1) Prior to a child's initial attendance, a licensee shall obtain the following documents:

(a) A completed child information card on a form provided by the department or a comparable substitute approved by the department.

Two child information cards were not completed with allergy information and were blank.

R 400.1907 Child's records.

(2) Records in subrule (1) of this rule must be reviewed and updated annually or when information changes.

Four child in care statements were not updated annually.

A corrective action plan was requested and approved on 03/30/2022. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.
