and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1933 Water supply; sewage disposal; water temperature.

(4) Hot water temperature must not exceed 120 degrees Fahrenheit at water faucets accessible to children.

The licensee, Ms. Nicholas, did not ensure the water temperature was below 120 degrees. The temperature of the water tested at 125.4 degrees.

A corrective action plan was requested and approved on 04/17/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
