III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the renewal inspection, I observed Ms. Wilson interacting with 2 children in care. She provided nurturing and responsive care to both children throughout the inspection period.

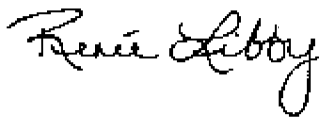

Technical Assistance was provided on the following:

- Adding a handrail to the steps of the front porch/deck.

The facility is in compliance with all applicable rules and statutes.

I recommend issuance of a regular license to this child care family home (capacity 1-6)
