III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During this inspection, I observed six child care children having outdoor playtime with the licensee in the fenced in backyard. Two of the six children were under 18 months of age and were with the licensee being held, and in a stroller, while the older children played with mobile equipment in the yard.

The facility is in compliance with all applicable rules and statutes

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
