III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my on-site inspection I observed free play. The home was clean and organized with a variety of age-appropriate equipment for the children to access. Ms. Monsma interacted with children in a positive and nurturing manner. She ensured appropriate care and supervision of children while they played. All home and child files were very organized and complete. Ms. Monsma has completed more than the required hours of training for each year.

I provided technical assistance and consultation on maintaining hazards inaccessible to children in bedrooms and answered questions about approving the basement level of the home as child use space.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
