III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my on-site inspection there was a variety of age-appropriate materials and equipment for the children to access. Home, child, and staff records were made readily available.

I provided technical assistance and consultation on the following rules:

- R 400.1905(7) Training; ensuring the in-person skills test is completed for CPR training.
- R 400.1906(1)(c) Records of a licensee; child care staff member; child care assistant; ensuring physical are completed every two years at renewal.
- R 400.1915(5) Indoor space; play equipment; ensuring the current recall list is posted.
- R 400.1934(4) Heating; ventilation; lighting; radon; ensuring radon tests are completed every four years at renewal.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
