## III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records.

Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my on-site inspection I observed all child care areas in the home. The home was neat and clean. There were age-appropriate toys and activities for child care children.

I provided Ms. Chatman Technical Assistance on one fire extinguisher in the kitchen. The extinguisher gauge was reading in the refill zone. Ms. Chatman indicated she was not aware of the readings gauge but would be replacing the extinguisher immediately. The extinguisher was new.

The facility is in compliance with all applicable rules and statutes.

#### IV. RECOMMENDATION

I recommend issuance of a original license to this child care family home (capacity 1-6).
