III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct

observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my on-site inspection I observed infants napping, free play, diapering, and dismissal. There was a variety of age-appropriate materials and equipment for the children to access. Ms. Mutoni interacted with the children in a positive and friendly manner. She used redirection as a form of positive discipline. She ensured she and the children washed their hands after diapering or using the bathroom. It was evident that Ms. Mutoni does activities with the children, most went home with a craft they had completed earlier in the day.

I provided technical assistance and consultation on the requirements for a child care staff member and the following rules:

- R 400.1907(1)(a) ensuring that all sections of the child information card have appropriate responses.
- R 400.1944(3) height requirements for mounted fire extinguishers.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
