III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and

training information. Children's records include child information cards and child in care statements/receipts.

At the time of the onsite inspection, Ms. Lemire was present with five child care children and her child, who is older than six years of age. The preschool-aged children had just finished lunch and engaged in free play while Ms. Lemire cleaned up and the toddlers finished eating. I also observed multiple diaper changes. Ms. Lemire provided appropriate care and supervision and appeared bonded with the children.

The facility is in compliance with all applicable rules and statutes.

During the exit conference, technical assistance/consultation was provided regarding the following:

- I reminded Ms. Lemire to fill in the licensing notebook summary sheet any time she receives a report or completes a corrective action plan.
- After lunch, Ms. Lemire was washing children's hands in the kitchen sink. The water from this faucet measured in excess of 123 degrees Fahrenheit. The water temperature in the bathroom measured 120 degrees Fahrenheit. Ms. Lemire will only wash children's hands in the bathroom unless the temperature in the kitchen sink is lowered.

IV. RECOMMENDATION

I recommend renewal of this family child care license.
