III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

When I arrived for the on-site inspection, Ms. Raymond was closed for the day and did not have child care children in care, but was caring for her 17 month old daughter. We completed a walkthrough of the home, reviewed programming and appropriate supervision. Ms. Raymond's home was free of any hazards.

The facility is in compliance with all applicable rules and statutes.

During the exit conference, technical assistance/consultation was provided regarding the following:

- Ensuring child information cards are completed prior to the child's first day in care, including date of admission.
- Completing consent and disclosure forms and keeping them on file.
- Add a plan for infants and children with special needs to emergency procedures.
- Fix safety latch in the kitchen or remove sharp items from the drawer.
- Upgrade fire extinguisher to 2A-10BC or larger.
- Notifying the department of closure dates.

IV. RECOMMENDATION

I recommend issuance of an original license to this child care family home (capacity 1-6).
