III. DESCRIPTION OF FINDINGS & CONCLUSIONS

Language for Full Inspection

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1907

Child's records.

(2) Records in subrule (1) of this rule must be reviewed and updated annually or when information changes.

Six children's records were reviewed. Four child information cards needed to be updated.

R 400.1915

Indoor space; play equipment and materials.

(5) As required by section 15 of the children's product safety act, 2000 PA 219, MCL 722.1065, a licensee shall conspicuously post in the child care home an updated copy of the list of recalled or unsafe children's products that is provided by the department through its Michigan Child Care Matters (MCCM) online newsletter and available at the department's website www.michigan.gov/mccmatters.

The most recent recall list was not posted.

A corrective action plan was requested and approved on 01/04/2022. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.
