III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

The facility is in compliance with all applicable rules and statutes.

During the onsite inspection I observed children engaged in a variety of age appropriate activities to enhance gross motor skill development. Children were resting and napping. Children engaged in free play and prepared for a snack. I observed diapering and sanitizing. Licensee and staff demonstrated nurturing care to the children who appeared to be thriving in their routines. Records were readily available and organized.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
