III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my onsite inspection I was able to observe Ms. Ferrier engage in positive interactions with the children in care. She is knowledgeable about each kid's needs and routine, the child care home is well cared for and free of any safety risks. Ms. Ferrier and I discussed the need for her to put a smoke detector in the master bedroom and that she needs to have her daughter complete the health and safety courses on miregistry as she provides care on a very minimal basis.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
