III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and

training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1934 Heating; ventilation; lighting; radon.

(4) A licensee shall test the child care home for the concentration of radon gas before the initial license is issued and every 4 years thereafter at the time of license renewal.

On 7/5/2023, records showed that there had not been a radon test completed in the last four years.

R 400.1941 Heat-producing equipment.

(5) The inspection specified in subrule (4) of this rule must be conducted before the initial license is issued and every 4 years thereafter at the time of license renewal.

On 7/5/2023, I observed the furnace inspection but there was no water heater inspection completed.

A corrective action plan was requested and approved on 07/05/2023. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care family home (capacity 1-6).
