III. DESCRIPTION OF FINDINGS & CONCLUSIONS

Language for Full Inspection

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

On 07/28/2022 during an onsite inspection there were six children present. Upon arrival children were eating breakfast. After eating children were cleaned up and then headed outside to play in the back yard. Children played with various equipment outside including chalk, sand and bicycles.

Technical assistance was provided regarding making sure child information cards are filled out completely including the date of admission for all children. Technical assistance was also provided regarding emergency plans and adding additional information such as contacting parents.

The facility is in compliance with all applicable rules and statutes.
