III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff,

and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the onsite inspection there were five children present. The children engaged in building blocks and Legos. The children ate cereal, milk, and bananas for breakfast. Technical Assistance was provided regarding using the correct response of "none" and "unknown" on the child information records as well as ensure children with allergies have an emergency plan. Ms. Hall has requested to provide 24-hour care, seven days a week. The change of child care hours will be reflected in the Bureau Information Tracking System. Ms. Hall has a bed for overnight child care. Ms. Hall is aware that overnight care may not begin until two additional beds are purchased.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care home.
