III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

When I arrived, Ms. Kinsey was providing care to five unrelated children. Children in care were resting. As children woke up, Ms. Kinsey addressed each child's needs. Ms. Kinsey provides a very nurturing and warm environment for the children in care. She has a sufficient amount of developmentally appropriate activities and equipment for the children to engage in.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1905 Training.

(1) A licensee shall complete not less than 10 clock hours of training each calendar year related to child development, program planning, and administrative management for a child care business, not including CPR, first aid, and infectious disease, including immunizations, training.

Ms. Kinsey did not complete 10 hours of training annually in 2021, including Health and Safety Ongoing Training in 2021.
