### III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the onsite inspection I observed free choice, toileting, and hand washing. Children were engaged with age-appropriate activities. Interactions between the Farber's and the children were positive and developmentally appropriate. The Farber's use a play based curriculum.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

**R 400.1905            Training.**

**(1) A licensee shall complete not less than 10 clock hours of training each calendar year related to child development, program planning, and administrative management for a child care business, not including CPR, first aid, and infectious disease, including immunizations, training.**

Mrs. and Mr. Faber did not complete 10 clock hours of training in 2022.

Technical assistance was given on the 3-step process for cleaning the diaper pad.

### IV. RECOMMENDATION

Upon receipt of an acceptable corrective action plan, I recommend issuance of a regular license to this child care group home (capacity 7-12).
