III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1932 Home maintenance and safety.

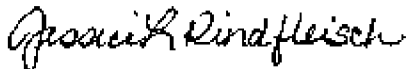

(2) All dangerous and hazardous materials or items must be stored securely and out of the reach of children.

During the on-site inspection, dangerous and hazardous materials, such as corded electrical appliances and razor replacements, were accessible to children in the bathroom on the lower level.

A corrective action plan was requested and approved on 04/21/2022. It is expected that the corrective action plan be implemented within the specified time frames as outlined in the approved plan. A follow-up evaluation may be made to verify compliance. Should the corrections not be implemented in the specified time, it may be necessary to reevaluate the status of your license.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care group home (capacity 7-12).
