III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During the onsite inspection I observed large group, hand washing, outside time, and departure. Interactions between child care staff members and children were positive and developmentally appropriate. The home was equipped with an adequate amount of age-appropriate play and learning equipment. Ms. Krumm uses her own curriculum based on the alphabet. She uses a theme-based curriculum during the summer months.

The facility is in compliance with all applicable rules and statutes.

IV. RECOMMENDATION

I recommend issuance of a regular license to this child care group home (capacity 7-12).
