II. Purpose of Addendum

On 08/04/2021 Jessica Compton submitted a Request for Modification of the Terms of the License. The request was to add two licensed rooms to the basement area of the home.

III. Methodology

08/04/2021: Modification request received

08/19/2021: Inspection completed on-site

IV. Description of Findings and Conclusions

The original license was issued on 03/30/2020 and there have been no addendums to-date. The area currently licensed on the main level of the home is the living/dining room, kitchen, and three bedrooms approved for child care space. The den/second living room is not approved as child care space. The basement is not approved as child care space.

The modification request adds a main playroom and an additional room that will be used for play and/or napping in the basement. The basement has an egress window which is a designated exit. This window is less than 44 inches from the floor to the bottom of the window and the square footage of the window exceeds 5 square ft of window surface. There is a ladder that leads from the window well to the ground level.

The following is licensed child care space:

on the main level of the home the living/dining room, kitchen, and three bedrooms are approved child care space. The approved areas were measured and meet the qualifications of 35 square feet per child. The approved space provides a total of 923 square feet. The den/second living room is not approved as child care space. In the basement there is a main playroom and a napping room that are approved for child care use.

The basement has an egress window which is a designated exit. This window is less than 44 inches from the floor to the bottom of the window and the square footage of the window exceeds 5 square ft of window surface. The window well has at least 9 square feet of area and is less 43 inches deep. There is a ladder that leads from the window well to the ground level. There are also stairs which exit to the main level of the home. The exits on the main level of the home are a front door located on the north side of the home exiting to grade and one at the south side of the home also exiting to grade.

The outdoor play area is located on the south side of the home. The play area is completely fenced with a gate. The children will never play outside of the fenced area and will always have adult supervision while engaging in outdoor time. There are no water hazards.

V. Recommendation

I recommend the main playroom and additional play/napping room be added to the terms of the license.
